Professional Summary

Information Science student with experience developing full-stack web applications and AI-powered solutions. Strong interest in software engineering, problem solving, and building practical technology through collaborative projects and active involvement in student developer communities.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, HTML, CSS
Frontend: React.js, Next.js, Streamlit, Tailwind CSS
Backend: Node.js, Express.js, FastAPI, RESTful APIs, Socket.io
Database: MySQL, PostgreSQL, MongoDB, Supabase
Tools & Platforms: Docker, Git, GitHub, AWS EC2, LangChain, Vercel

Experience

Web Developer Aug 2025 – Present
Innovex Student Developer Community (ISDC)

- Mentored a project team in developing a responsive, mobile first portfolio website for Tandoor Hotel using Next.js, coordinating development, reviewing code, deploying the website, and supporting ongoing maintenance.
- Contributed to the development of the Sahyadri College Placement Portal by implementing the Placement Coordinator module, developing the Login page with Firebase Authentication, and implementing branch specific access control to securely manage student and placement data.

Projects

SyncVerse - Real time Collaborative Coding Platform | Live Demo Jan 2026 – Feb 2026
React.js, Node.js, Socket.io, Yjs, Docker, AWS EC2
Platform for real time collaborative coding with AI-powered code review and multi language code execution.

- Implemented conflict free real time code synchronization using Socket.io and Yjs, enabling multiple developers to edit shared workspaces simultaneously.
- Integrated AI-powered code review, multi language code execution, and collaborative whiteboarding, and deployed the application on AWS EC2 using Docker.

NexPrice - E-commerce Price Tracking Platform | Live Demo Apr 2026 – May 2026
Next.js, Supabase, PostgreSQL, Firecrawl, Recharts, Resend
E-commerce price tracking platform that monitors products across multiple stores and sends automated price drop notifications.

- Implemented automated product price tracking across multiple e-commerce websites using Firecrawl for web scraping.
- Built interactive price history dashboards with Recharts and integrated Resend for automated email notifications.

DocPilot - AI Documentation Assistant | Live Demo Jun 2026
Python, LangChain, Groq API, Pydantic, Streamlit
AI-powered documentation assistant that generates README files, docstrings, and API documentation from source code.

- Integrated LangChain with the Groq API to automatically generate README files, docstrings, and API documentation from source code.
- Validated AI generated outputs using Pydantic models and deployed the application on Streamlit Cloud.

Certifications & Achievements

HackerRank Problem Solving (Intermediate) Certification	2026
Postman API Fundamentals Student Expert Certification	2025
React & Next.js Development with AI Integration (Udemy)	2025
Completed the 5-Day AI Agents: Intensive Vibe Coding Workshop with Google (Kaggle)	2026
Participated in the Vibe2Ship Hackathon organized by Coding Ninjas	2026

Education

B.Tech in Information Science and Engineering	2023 – 2027
<i>Sahyadri College of Engineering and Management</i>	CGPA: 8/10
Class XII (PCMC)	2021 – 2023
<i>Viveka Pre-University College, Kota</i>	95.33%
