Professional Summary

Information Science Engineering student with hands on experience in full-stack development and AI-driven applications. Proficient in Java, Data Structures & Algorithms, and software development fundamentals, with strong problem solving skills and experience collaborating in teams to build efficient and scalable software solutions.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, HTML5, CSS3
Frontend: React.js, Next.js, Tailwind CSS
Backend: Node.js, Express.js, FastAPI, RESTful APIs, Socket.io
Database: PostgreSQL, MongoDB, Supabase
Tools & Platforms: Docker, Git, GitHub, AWS, Vercel, LangChain, Ollama
Concepts: Data Structures & Algorithms, Object-Oriented Programming, LLM Integration, Agile

Experience

Web Developer Aug 2025 – Present
Innovex Student Developer Community (ISDC)
• Led the development of a responsive, mobile first restaurant website for Tandoor Hotel using Next.js, collaborating with a 10+ member team to deliver key features including menu, gallery, reviews, and contact, while contributing to code reviews, performance optimization, and production deployment.
• Contributed to the development of the Sahyadri College Placement Portal by implementing the Placement Coordinator module, developing the Login page with Firebase Authentication, and implementing branch specific access control to securely manage student and placement data.

Projects

SyncVerse - Real-time Collaborative Coding Platform | Live Demo Jan 2026 – Feb 2026
React.js, Node.js, Socket.io, Yjs, MongoDB, Docker, AWS EC2
Scalable platform for real time collaborative coding with AI-powered coding assistance and multi language code execution.
• Designed and developed the collaborative coding workspace using React.js and Monaco Editor, supporting real time code editing and conflict-free synchronization with Socket.io and Yjs.
• Integrated Gemini API for AI-powered coding assistance and Judge0 for multi language code execution, with MongoDB for database management; containerized and deployed the application using Docker on AWS EC2.

NexPrice - E-commerce Price Tracking Platform | Live Demo Apr 2026 – May 2026
Next.js, React, Supabase, PostgreSQL, Firecrawl, Recharts, Resend
E-commerce platform that tracks product prices across multiple stores and provides price comparisons and automated price drop alerts.
• Developed a responsive Next.js frontend with product search, price comparison, and interactive price history visualization.
• Implemented automated price tracking using Firecrawl and scheduled daily price checks with Supabase Cron, storing price data in PostgreSQL and sending price drop alerts through Resend; deployed the application on Vercel.

DocPilot - AI Documentation Assistant | Live Demo Jun 2026
Python, LangChain, Groq API, Pydantic, Streamlit
AI-powered developer tool for generating documentation directly from source code.
• Built a documentation assistant with LangChain and Groq API to automatically generate README files, docstrings, and API documentation from source code.
• Added Pydantic for structured output validation and deployed the tool on Streamlit Cloud for browser based access.

Certifications & Extra-Curricular Activities

• HackerRank Problem Solving (Intermediate) Certification	2026
• Postman API Fundamentals Student Expert Certification	2025
• React & Next.js Development with AI Integration (Udemy)	2025
• Completed the 5-Day AI Agents: Intensive Vibe Coding Workshop with Google (Kaggle)	2026
• Participated in the Vibe2Ship Hackathon organized by Coding Ninjas	2026

Education

B.Tech in Information Science and Engineering Sahyadri College of Engineering and Management	2023 – 2027 CGPA: 8.0
Pre-University Course (PUC) – PCMC Viveka PU College, Kota	2021 – 2023 95.33%
